

# \$\$\$\$\$\$\$\$\$ GITOLITE \$\$\$\$\$\$\$\$\$\$

## Adding new user 😊:

Step 1. Generate public and private key using ssh-keygen on your local server  
ssh-keygen

Step 2. Copy user public key on git server  
scp key.pub root@<git-server-ip>:/tmp/admin.pub

Step 3. Run below command to add user on server by git user  
~/bin/gitolite setup -pk /tmp/admin.pub

Step 4. Verity by running below command from the local server.  
ssh git@<git-server-ip>  
Output :-

```
X11 forwarding request failed on channel 0
PTY allocation request failed on channel 0
hello admin, this is git@sales running gitolite3 v3.6.14-2-g3dc8093 on git 1.8.3.1

R W    gitolite-admin
R W    testing
```

# Thank You
